

Laser & IPL

Lasers and Intense Pulsed Lights (IPL) have been used in the medical and aesthetic industries for quite some time now and are certainly a market leader when it comes to Skin treatments like Removal, Rejuvenation and Correction.

CUTERA Lasers & Dual Light devices define the forefront of medical grade aesthetic devices that are exquisitely engineered to deliver the highest level of performance, safety and efficacy (FDA approved and TGA registered). These devices address a wide range of Face + Body medical aesthetic applications—with results that drive patient satisfaction and practice growth.

TruPulse™ Nd:YAG Laser

This Laser offers treatment for a broad range of conditions and is optimized for the treatment of vascular lesions on face and body, Hair removal on dark skin types and the highly popular Laser Genesis™ procedure for skin revitalization, pores, texture and scars, as well as deeper pigmentation and treatments for stubborn nail fungus infections and warts.

Intense Pulsed Light (IPL)

Dual Light’s & CUTERA’s broad menu of IPL options provides a full range of treatments for Hair removal and the signs of aging. These IPL devices can diminish the appearance of fine lines and wrinkles, dyschromia, pigmentation, sun damage, acne, open pores, dull or uneven skin tone and scarring.

PLEASE NOTE A CONSULTATION AND POSSIBLE PATCH TESTING IS NEEDED BEFORE TREATMENTS CAN TAKE PLACE!
