

## MediSkin –Laser & IPL

### Laser & IPL

Lasers and Intense Pulsed Lights (IPL) have long been mainstays in both medical and aesthetic fields, leading the market in skin treatments like Removal, Rejuvenation, and Correction.

CUTERA Lasers & Dual Light devices are at the forefront of medical-grade aesthetic technology. Meticulously engineered for top-tier performance, safety, and efficacy, these FDA-approved and TGA-registered devices cater to a broad spectrum of Face + Body medical aesthetic applications. Their outstanding results drive patient satisfaction and practice growth.

### Cutera Excel V

This laser effectively treats various conditions, optimized for vascular lesions on the face and body, hair removal on darker skin tones, and the popular Laser Genesis™ for skin revitalization. Its applications include addressing rosacea, facial veins, leg veins, wrinkles, acne, pigmented lesions, age spots, scars, and more. Additionally, it offers treatments for deeper pigmentation concerns and targets stubborn nail fungus infections & warts.

### Dual Light

Dual Light's versatile range of IPL options offers comprehensive treatments for hair removal, signs of aging, and environmental damage. These IPL devices effectively diminish fine lines, wrinkles, dyschromia, pigmentation issues, sun damage, acne, open pores, dull or uneven skin tone, freckles, and scarring.

**Please note that a consultation and potential patch testing are required before treatments can commence.**

**Prices are estimated and subject to variation based on the size of the treatment area.**
