Dermastamp®

SCAR
REDUCTION
THERAPY

The solution to stamp away scars + wrinkles!

Dermaroller, are true market leaders in skin needling. We are very successful with results. We have now evolved this technology and are very excited to introduce the NEW Dermastamp to you today. Clinically proven to induce collagen and reduce scarring, German engineered, Dermaroller has developed a stamping device that increases skin stimulation and takes standard skin needling to a new level. The Dermastamp uses vertical penetration to puncture old scar tissue found deep in the skin. Scar tissue holds the skin down creating a crater/indentation effect on the skin.

"Feed your face and instantly stimulate it"

Dermastamp uses very fine needles to promote tissue stimulation, once old scars are broken, new collagen will help soften out topical visible scars. The Dermastamp is unlike any heat based technology as there is no skin burning and skin coagulation. The side effects are dramatically reduced and the risk, almost zero.

WHAT IS A DERMASTAMP TREATMENT?

The Dermastamp is a vibrational stamping device, unlike a manual handheld roller.

HOW IS THE PROCEDURE PERFORMED AND DOES IT HURT?

The skin is cleaned and sterilized. Generally the skin will need to be numbed to ensure your comfort. Therefore the treatment is considered painless. The tip will glide over your skin creating stimulating channels and an even flushing is the best indication for a perfect medical treatment. The treatment usually takes around 1.5 hours in total.

CAN IT BE PERFORMED ON ANY SKIN COLOUR?

Since we are not using heat, yes the Dermastamp can be used on any skin colour and skin type.

HOW LONG BEFORE I SEE RESULTS?

You will see results instantly. However collagen will grow from around the 6 week mark. Your skin will continue to improve over 6-12mths.

HOW OFTEN CAN I HAVE THE DERMASTAMP?

Scars + Acne Scar Reduction - 4-6+ treatments / 4 weeks apart

SHOULD YOU EXPECT DOWNTIME FROM THIS TREATMENT?

The inflammatory reaction of the skin is extremely short and fades significantly within hours from redness to pinkish that may last from 12 to 48 hours on average. In order to reduce visible redness, we recommend topical healing minerals + hyaluronic acid to help hydrate the skin. Zinc sun protection is also recommended.

WHAT SHOULD YOU AVOID AFTERWARDS?

Nothing too stimulating! You must avoid AHA's, retinol (vitamin A) or anything acidic or 'active' for a minimum of 2 days.

WHAT SHOULD YOU USE ON YOUR SKIN AFTERWARDS?

Only use a soothing cleanser to clean, hyaluronic acid to help hydrate as your skin will become very dry. An extra hydrating moisturiser might be needed. Also copper + zinc to help heal and protect.

CAN YOU INCREASE RESULTS AT HOME?

Dermaroller recommends their homecare roller system to help stimulate the skin and help penetrate ingredients deeper into it. Use every second day or even just up to once a week to see results.

Dermastamp System Treats:

Tissue Regeneration

Skin Rejuvenation

Collagen Induction Therapy

Scar Reduction Therapy

Fine Lines

Wrinkles

Deep Wrinkles

Hyper - Pigmentation

Pore Size Reduction

Stretch Marks

Acne Scarring

Skin Tightening

Isolated Scarring
